International Financial Reporting Standards

There is a growing concern that the highly complex International Financial Reporting Standards (IFRS) are difficult to implement in practice, and will require substantial investment in database software. The problem is very acute for medium sized companies who may not have the resources to implement the standards in the detail that is required.

With well trained professionals however, the burden can be substantially reduced. By keeping abreast of changes professionals can plan ahead.

Overview

- Applying IFRS in Practice
- The Framework
- Statement of Financial Position
- Statement of Comprehensive Income
- Statement of Changes in Equity
- Statement of Cash Flows: choice between direct and indirect method

Financial statement presentation and disclosure

- IAS 8 Changes in accounting policies, estimates and accounting errors
- Related parties disclosure
- Discontinued operations
- Operating segments

IFRS 9 Fair Value & Cash Flow Hedge Accounting

- Identifying ineffectiveness
- Splitting a hedge between effectiveness and ineffectiveness
- Excluding spot forward differential
- Addressing documentation issues
